## Terberg Kinglifter truck mounted forklifts

**TERBERG**  
**KINGLIFTER**  
Manufacturer of truck mounted forklifts

Terberg Kinglifter BV manufactures truck mounted forklifts by the name of Kinglifter and they are available in many variants.

The defining feature of every model of these top quality machines is the outstanding power-to-weight ratio. Professional users appreciate how valuable a quality this is.

The operator sits entirely within the contours of the machine so that work can be performed safely.

- Productive & cost-effective.
- Independant loading and ré-loading.
- Modular construction.
- Low own weight.
- Minimal rear overhang.
- Low operating cost
- Ergonomic and safe drivers position.
- Durable stainless steel plating.
- Available in custom colour.

The engine compartment is easily accessible thanks to the hinged engine covers. This simplifies maintenance activities.

**King Lifter**

Mount and dismount time approx. 60 sec.

## model configurations

### KingLifter S

The Kinglifter S-type is the most compact machine in the Terberg Kinglifter range. This Terberg Kinglifter is completely in its element where limited dimensions and a low kerb weight are of the essence.

This machine comes in a range of models and is surprisingly powerful for its size. There is a choice between a design with an 27 hp diesel engine for example, 1-wheel or 3-wheel drive, masts with a lifting capacity of 1500 or 2000 kg and a lifting height from 1800 to 3200 mm, fixed or retractable legs, many fork and wheel alternatives and plenty of optional extras.

In short, there is a tailor-made S-type Terberg Kinglifter for for whatever your specific application demands.

### KingLifter M

The Kinglifter M-type is the best all-round machine in the Terberg Kinglifter range. Many users choose this model on account of its many variants and suitability for different applications.

There is a choice between a design with a 30 or 38 hp direct injection diesel engine for example, 1-wheel or 3-wheel drive, 4-way steering, masts with a lifting capacity of 2000 or 2500 kg and a lifting height of 2800 to 4050 mm, fixed or retractable legs, many fork and wheel alternatives and plenty of optional extras.

In short, there is a tailor-made Terberg Kinglifter M-type for whatever your specific application demands.

**Model M is also deliverable as a 4-wheel steering system**

### KingLifter L

The Kinglifter L-type is the most powerful machine in the Terberg Kinglifter range. The Kinglifter L-type is available in many variants.

There is a choice between a design with a 50 hp direct-injection diesel engine for example, 3-wheel drive, 4-way steering, masts with a lifting capacity of 2500 kg and a lifting height of 2800 to 4050 mm, fixed or retractable legs, many fork and wheel alternatives and plenty of optional extras. In addition, chain-free masts can be supplied with a lifting height of 2800 mm to 3600 mm. In short, there is a tailor-made Terberg Kinglifter L-type for whatever your specific application demands.

**Model L is also deliverable as a 4-wheel steering system**
